## THE APPLICATION AND ITS BENEFITS

The FIS/fci optimization as part of FIS/edc can be used to automatically enter **paper documents** or **electronic documents**, such as PDF documents, in the existing SAP solution. Document characteristics, such as vendor name, address, phone, fax, bank details and tax number, are automatically matched with the master data record in the ERP system.

Excellent recognition rates are achieved using an extensive **test methodology**. Of course, FIS/fci is suitable for all typical documents in companies, such as invoices, order responses, delivery notes and orders.

### Your benefits:

- Genuine free form recognition
- High recognition rates as from the first invoice
- Self-learning system (knowledge base)
- Vendor recognition > 95%
- Reading of item data
- Automatic check: e.g. art. 14 UstG (sales/purchases tax law); totals, taxes, country-specific requirements, etc.

## 2023 – Latest Developments

- **Processing of signed e-mails**
  - An additional configuration option can now be used to open and read signed e-mails as well.
- **Improved organization of master data provision**
  - A new module can be used to synchronize the master data from the SAP system more efficiently and clearly.
- **Use of Asian characters for the search**
  - Asian characters can now also be used for the search.
- **Optimized cooperation with FIS/eInvoicing**
  - To improve the processing of electronic invoices, the communication with FIS/eInvoicing has been optimized. This includes the transmission of XRechnung (Xinvoices) and the processing of the latest ZUGFeRD version. Consequently, e-invoices and conventional invoices can be received in one mailbox and processed.
- **KidNo support**
  - If Scandinavian invoices are concerned, FIS/fci is able to process the KidNo number (Scandinavian: Kunde Identifikasjon Number / customer identification number).

# RELEASE-HIGHLIGHTS FIS/fci Cloud

## 2023 – Latest Developments

- **Enhancement of CloudCor by master data editors**
  - It is now possible to define partner master data and document templates in CloudCor to further improve the recognition rates.
- **User management via Active Directory**
  - Microsoft Active Directory can be used for CloudCor to make user management efficient. This enables an automatic user creation and synchronization in FIS/fci.
