

Release Highlights

FIS/edc for Document Processes

Please find here the FIS/edc release highlights . Accompany us on our way to the digital future - we are looking forward to it!

Note

The specifications and information by FIS Informationssysteme und Consulting GmbH contained in this document are without obligation and non-binding. The information represents only an extract and reflects the current status. FIS expressly reserves the right to make subsequent changes to these specifications and information. The specifications and information in this document represent confidential information of FIS and must be kept secret by the recipient. In particular, the passing on of these specifications and information to third parties is prohibited.

The application and its benefits

Document management is of high importance for the digitization of business processes. It is the central element for optimizing the operative business and simplifying the work within the user departments.

You can use FIS/edc, the Electronic Document Center for SAP, as a convenient tool for entering, processing and archiving paper documents and electronic formats (e.g. ZUGFeRD, EDI, XRechnung). FIS/edc enables the connection and integration of customers and vendors to your existing SAP system. Documents, such as invoices, order responses, delivery notes and orders, are processed automatically. Fast processing times have a positive effect on the cost structure of your company.

Your benefits:

- Full integration into the SAP system
- Increased productivity and efficiency due to integrated and automated business processes
- High flexibility through integrated mobile approval procedures for invoice verification
- High transparency of invoice verification has a positive effect on enterprise management due to process-related evaluations
- Improved cash management through modernization of the payment process
- Promotion of vendor relations through shorter payment cycles
- More satisfied customers through accelerated and automated sales order processing

FIS/edc NextGeneration Release Highlights

2025 – Latest developments

FIS/edc NG is S/4HANA 2023 FSP1 and FSP2 ready

- All FIS/edc Monitors are S/4HANA 2023 FSP1 and FSP2 ready

Integration of the cloud solutions into the "new" Lifecycle Manager

- The FIS/edc NG solutions were integrated into the current 2024 version of the Lifecycle Manager.

FIS/edc NextGeneration Release Highlights

2025 – Latest developments

MONITOR FOR INCOMING INVOICES

Ensured eInvoicing capability

- In addition to incoming documents from SAP eDocument Cockpit and the integration of FIS Invoice Refinement Service, enhancements were made for the determination of company code and vendor as well as checks according to § 14 UstG (Value-Added Tax Act) in order to ensure the eInvoicing capability.

AI service for intelligent approver and account assignment determination

- The AI service can be used to predict approver and account assignment data and, as a consequence, fields in SAP can be filled automatically. This reduces manual processing steps and increases the degree of automation of the FI invoice receipt process.

Optical adjustments of the approval app

- In the course of modernizing the user interface, the screen display was optimized in the approval app. In this way, the user experience is improved.

FIS/edc NextGeneration Release Highlights

2025 – Latest developments

ORDER RESPONSTE MONITOR

Reading purchase order data directly from SAP

- Now, it is possible to read purchase order data directly from the SAP system in real time

FIS/edc Cloud Release Highlights

2025 – Latest developments

Provision of a dashboard for all FIS/edc Cloud users

- Users of an FIS/edc Cloud solution are now provided with an internal and external system and application analysis in the form of an individually configurable dashboard. This increases the transparency of the individual document processes.

FIS/edc Cloud Release Highlights

2025 – Latest developments

MONITOR FOR INCOMING INVOICES

Provision of FIS/edc Cloud for invoice receipts

- FIS/edc Cloud for invoice receipts is available as a basic version of a public cloud solution. Here, the further developments focus on eInvoicing.

Ensured eInvoicing capability

- Through the connection to SAP eDocument Cockpit, FIS/fci Cloud, FIS/InvoiceRefinementService and FIS/InvoiceOutboundService, the customer can be provided with an all-in-one invoice processing package, which meets the national and international requirements related to electronic invoices.

AI service for intelligent approver and account assignment determination

- The AI service can be used to predict approver and account assignment data and, as a consequence, fields in SAP can be filled automatically. This reduces manual processing steps and increases the degree of automation of the FI invoice receipt process.

FIS/edc Cloud Release Highlights

2025 – Latest developments

ORDER RESPONSE MONITOR

Extension of the cloud solution for order responses

- Further new functions were developed for the FIS/edc Cloud solution for order responses.

FIS/edc Cloud Release Highlights

2025 – Latest developments

SHIPPING NOTIFICATION MONITOR

Development of the shipping notification monitor

- The cloud solution for shipping notifications is already being developed with first pilot customers in the extension stage. This means that FIS/edc Cloud is enhanced by another document category.
