The specifications and information in this document represent confidential information of FIS and must be kept secret by the recipient. In particular, the passing on of these specifications and information to third parties is prohibited.

The application and its benefits

FIS/TradeFlex is the central switching point for successful marketplace business in the SAP environment. The solution seamlessly connects your SAP systems with a multitude of online marketplaces – without any development efforts, but with maximum efficiency. Thanks to consistent process coverage from listing to back processing, intelligent automation and user-friendly interface, enterprises keep an overview at any time and noticeably optimize their processes. No matter whether the launch of a marketplace business or the optimization of existing marketplace activities is concerned: With FIS/TradeFlex, you will provide the technological basis for greater reach, increased sales and satisfied customers – centrally controlled, fully integrated and extendable by new marketplaces at any time.

Your benefits:

- Comprehensive and deep system integration in SAP
- Integration of new marketplaces with a few clicks
- Easy product listing on diverse marketplaces
- End-to-end process coverage
- Full transparency of the marketplace business, incl. reporting
- Automated clearing of open items

- **Optimization of offer design: automated price and profit margin calculation**

To automate offer design and pricing, offers can automatically be transferred to marketplaces or updated. This reduces manual efforts and enables more up-to-date pricing.

- **Price calculation based on competitors' prices and MSRP (= manufacturer's suggested retail price)**

Further development of automated pricing and profit margin calculation

To be able to react to competitive prices, a competitive price from specific marketplaces can be used as a basis for price calculation. This enables competitive pricing. To keep the SAP system load as low as possible here, prices can now be created without having to run through the standard SAP pricing.

- **Integration into SAP Public Cloud**

Complete process integration into SAP Public Cloud.

- **Integration into TikTok shop**

A trend topic in the marketplace business is social commerce: a characteristic value of electronic commerce where active customer involvement as well as the personal relationship and the communication among customers are paramount. This is exactly what even the TikTok platform now relies on with its marketplace, which was launched in Germany on March 31st, 2025. As one of the first integrators, FIS/TradeFlex successfully provides the corresponding interfaces!
